PROJECTS

College Website clone

| [HTML, CSS, PHP, MySQL](#)

- Develop the **front-end** to publish and maintain a website for our college.
- Revamped the college website to serve as a one-stop resource hub, consolidating essential details on campus facilities, faculty members, infrastructure, and transportation services.
- Implemented a comprehensive clone of my college website project. Utilized HTML, CSS, and JavaScript to recreate the frontend user interface with pixel-perfect accuracy.
- Frameworks like Bootstrap to ensure responsiveness across various devices and screen sizes

Event Planne

| [HTML, CSS, JavaScrip](#)

- Development of a wedding event planner website catering to couples seeking personalized event management services
- Utilized modern web technologies including HTML5, CSS3, and JavaScript to design an intuitive and visually appealing frontend interface .
- Successfully launched the website, exceeding client expectations and contributing to increased business visibility and customer engagement.
